

**NYSDEC/USEPA Video Conference  
August 25, 2016**

**Agenda**

**Hudson River**

- OM&M Plan - DEC has provided recommendations to EPA related to data needs and we would like to know where these stand and what EPA's schedule is for engaging GE on the OM&M plan. On a related note, we understand that sediment sampling is to be conducted this year yet we have not heard anything about when this work will occur.
- Available Support Agency funds - We still have not heard back from EPA regarding available support agency funds for floodplains RIFS or sediment/dredging OM&M oversight.
- Habitat Restoration - We still have not yet come to completion on a number of habitat comments.
- Fish Monitoring Program - EPA has promised a write up of the filet study, and to continue to work on the other unresolved issues with the fish monitoring program, but no apparent progress has been made on this.
- 5 Year Review.

**Northrop Grumman**

- Plans for next coordination meeting.
- Saladino Study.
- Schedule for Navy revised white paper re: potential options for dispensing treated water.

**New Cassel**

- Letter re: Hicksville 4-2.

**Li Tungsten**

- AROD review.
- Initiation of pre-closing work on Parcel A.
- DEC's plans for pre-closing approvals on Captain's Cove.

**Gowanus**

- New bulkhead installation at Bayside fuel Terminal without State notification.

**FMC**

- OU3 CMS - DEC wants to get this moving, approve the CMS and start the DSOB.
- Carbofuran - We see haz waste going into the WSI.
- Permit.
